## **NSCC PROGRAM AMENDMENT 2025-02 (PRECISION RIFLE)**

To address a minor rulebook error and to ensure all competitors can get zero data, the following amendments have been implemented for NSCC 2025:

1. In Match 63, para 6.53 1 e indicates that the scoring is V, 5 & 4 only... this is incorrect.
  - a. There is a '3' scoring zone on both the Fig 11/59 and DCRA 200m C Face targets.
2. There will not be an opportunity for all to get a walk back zero.
  - a. As a mitigation measure, the precision rifle program will be altered as follows:
    - b. Day one will see the following matches shot:
      - i. Match 60, 61, 62 & 64 (all will have four sighting shots instead of two)
      - ii. 500 zero (max five rounds)
    - c. Day two will see the following matches shot:
      - i. Match 63 (as per the rulebook with 1 field expedient sighter), 65, 66 & 67 (all will have four sighting shots instead of two)

Martin Cashin
